2163

DATE MAILED: 08/23/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/091,885	Applicant(s) KAUFFMAN, STEVEN VICTOR	
	Examiner LINH BLACK	Art Unit 2163	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 June 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4, 9-14, 16-19 and 21-32 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4, 9-14, 16-19, and 21-32 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

This communication is in response to the Applicant's arguments dated 6/2/06. Claims 1-4, 9-14, 16-19, and 21-32 are pending in the application.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2, 4, 9-10, 12-14, 16-19, 21-26, 28-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Exley et al. (US 5724577), and further in view of Bendik (US 2002/0046224).

As per claims 1, 9, 16, Exley et al. teach
a module that provides a key that includes (1) a unique identifier of a datum
– col. 2, lines 8-31; col. 3, lines 13-50.
an additional attribute – col. 2, lines 9-12; col. 3, lines 32-50.

Art Unit: 2163

wherein said key is utilized by a process that associates said key with said datum in an index of said datum, so that said additional attribute is also associated with said datum in said index – col. 2, lines 7-31; col. 3, lines 13-30; col. 4, lines 1-35.

However, Exley et al. do not explicitly teach a key that also includes an additional attribute. Bendik teaches document management systems and methods – the title. Bendik teaches a unique key that also includes an additional attribute – pars. 0007, 0015. Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to combine Exley et al.'s teaching with Bendik's teaching to allow the indexing of encoded attributes in unique identifiers in order to facilitate efficient search and browsing to end users.

As per claims 2, 10, 17, Exley et al. do not explicitly teach "additional attribute is encoded into said unique identifier". However, Bendik teaches the unique document identifier comprises a numeric portion 410 and one or more information portions 420 that assist in identifying documents by providing information about the document – par. 0063. Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to combine Exley et al.'s teaching with Bendik's teaching to allow the indexing

Art Unit: 2163

of encoded attributes in unique identifiers in order to facilitate efficient search and browsing to end users.

As per claims 4, 12, Exley et al. teach wherein said datum is stored in a database – col. 2, lines 7-31; col. 3, lines 13-31.

As per claims 13, 18, 22-25, 29, Exley et al. do not explicitly disclose a network having a plurality of nodes. Bendik teaches method for management of documents over a network of computers – pars. 0001. Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to combine Exley et al.'s teaching with Bendik's teaching in order to allow users utilizing networks to connect and search for desired data.

As per claims 14, 19, Exley et al. teach wherein said creating is performed for said plurality of data – col. 2, lines 7-31; col. 3, lines 13-30.

As per claims 21, 26, 28, Exley et al. teach unique keys associates with the values found in the relational information table – col. 4, lines 22-35; a module that searches said index and obtains a list that includes said first key and a second key – col. 3, line 50 to col. 4, line 37. Exley et al. disclose the

sorted order or data groups and subgroups determined by index keys – col. 3, lines 31- 50; fig. 3.

As per claims 30-32, Exley et al. teach a module that searches an index of data, wherein said data includes a first datum associated with a first key that includes a unique identifier of said first datum – col. 2, lines 8-31; col. 3, lines 13-50.

an additional attribute having a first value – col. 2, lines 9-12; col. 3, lines 32-50.

Exley et al. teach unique keys associates with the values found in the relational information table (second datum) – col. 2, lines 11-31; col. 3, lines 23-50; col. 4, lines 22-35.

obtains a list that includes said first key and a second key – col. 3, line 50 to col. 4, line 37.

the sorted order or data groups and subgroups determined by index keys – col. 3, lines 31- 50; fig. 3.

However, Exley et al. do not explicitly teach a key that also includes an additional attribute. Bendik teaches document management systems and methods – the title. Bendik teaches a unique key that also includes an additional attribute – pars. 0007, 0015. Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to combine Exley

et al.'s teaching with Bendik's teaching to allow the indexing of encoded attributes in unique identifiers in order to facilitate efficient search and browsing to end users.

Claims 3, 11, 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Exley et al. (US 5724577), Bendik (US 2002/0046224), and further in view of Richards et al. (US 2002/0016922).

As per claims 3, 11, Exley does not explicitly teach digital documents. Bendik teaches management of digital documents – pars. 0002, 0007. However, Richards et al. further teach digital files, search keywords, search engines – pars. 0044, 0059; database key index file – pars. 0077-0078. Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to combine Exley et al.'s teaching, Bendik's with Richards et al. in order to allow efficient search and browsing of digital files.

As per claim 27, Exley et al. teach wherein said creating is performed for said plurality of data - col. 2, lines 7-31. Exley et al. do not explicitly disclose a network having a plurality of nodes. Bendik teaches method for management of documents over a network of computers – pars. 0001. Richards et al. teach network communications with remote users;

Art Unit: 2163

subscribers or apparatus – pars. 0060, 0081, 0138; digital files can be queried by users – pars. 0059, 0079, 0138. Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to combine Exley and Bendik et al.'s teachings with Richards et al.'s in order to allow users utilizing networks to connect and search for desired data.

Response to Arguments

Applicant's arguments with respect to claims 1-4, 9-14, 16-19, and 21-32 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

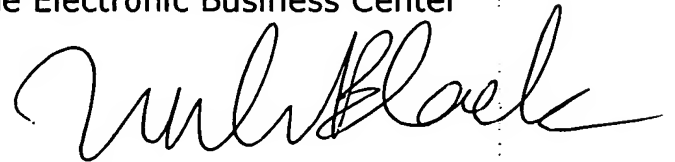

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LINH BLACK whose telephone number is 571-272-4106. The examiner can normally be reached on 8am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on 571-272-1834. The

Art Unit: 2163

fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
